

December 2021 - Release 20211222

The Current release of autoecat includes a number of major updates.

Enhancements

SSL Security Update

autoecat.com will now operate with proper HTTPS security, preventing up to date browsers from posting warnings about potential data sharing. This also ensures secure traffic to and from the autoecat server as well as your web servers.

Industrial Catalogue

The most impactful update of this release from a feature standpoint is the full redesign of our industrial catalogue. We have reviewed our approach, which previously only included stocking items. The new release of the industrial catalogue includes all items we currently receive data from, which totals over 700,000 unique parts.

The Data

<p>541081PB ⓘ A/C Clutch and Compressor A/C Compressor and Component Kit</p> <p>FOURSEASONS</p> <p></p> <p>Product Description:A/C Replacement Kit ; Complete Air Conditioning Kit w/ New Compressor ; Complete Air Conditioning Kit w/ New Compresso... --	--	---	--

The setup for the industrial catalogue is also much more streamlined. Simply add your desired vendor code into the Catalogue Vendor field of your category maintenance, and the catalogue will be updated to reflect the new vendor.

autoecat application based vendors will still need to be maintained via the catalogue preferences

All product classification and updates are handled by AMS and the catalogue is updated on a monthly basis

Searching Product

We have also enhanced our search capabilities within the industrial catalogue. There are two primary ways to filter down or search for product.

Filtering By Class / Subclass

The more traditional option to search would be by filtering down the Class / Subclass options:

Filters (0 selected)

Applied Class Filters

Class Filters

- A/C Accumulator / Receiver Drier (250)
- A/C Clutch and Compressor (529)
- A/C Condenser and Evaporator (132)
- A/C Flow Restrictors (102)
- A/C Service (254)
- ABS Components (33)
- Accessory Drive Belt System Components (6888)
- Adhesives (397)
- Air Bag System (1)
- Air Injection System (40)
- Air Tools (278)
- Alignment (388)
- Alternator / Generator and Related Components (6019)
- Anti-Theft System (7)
- Appearance Products (145)
- Assortments (196)
- Automatic Dual Clutch Transmission Components (3)
- Automatic Transmission Components (105)
- Axle Shaft (593)
- Back Glass Wiper Arm, Blade, and Related Components (26)
- Battery Service (21)
- Battery and Related Components (1117)

Clicking next to any class will filter the items displayed to be only items within that class. You can then filter further by clicking one of the sub class options. This will filter down the results to only be items within the selected subclass(es).

Filters (1 selected)

Applied Class Filters

- Adhesives (397)
 - Multi Purpose Tape (220)
 - Reflective Tape (58)
 - Contact Adhesive (40)
 - Epoxy (34)
 - Electrical Tape (14)
 - Caution Tape (9)
 - Tank Repair Kit (6)
 - Duct Tape (4)
 - Muffler / Exhaust Putty (3)
 - Multi Purpose Adhesive (3)
 - Heat Reflective Tape (2)
 - Coolant Sensor Adhesive (1)
 - Lens Repair Tape (1)
 - Multi Purpose Weatherstrip (1)
 - RTV Silicone (1)

Class Filters

- A/C Accumulator / Receiver Drier (250)
- A/C Clutch and Compressor (529)
- A/C Condenser and Evaporator (132)
- A/C Flow Restrictors (102)
- A/C Service (254)
- ABS Components (33)

Searching For Product via the Search Bar

The more flexible option to find product would be via our enhanced search bar function. This will search for any items that match **ALL** of the terms you enter. When searching the non-application catalogue, the search will interrogate all of the following when trying to find a match

- Product Class
- Product Subclass
- Product Description
- Product Attributes
- Part Number
- Vendor Name
- UPC Code

This allows you to search as broad

goggles

Filters (1 selected)

Applied Class Filters

- Safety Products (24)
 - Face / Eye Protection (22)
 - Safety Glasses (2)
 - Safety Boots (0)
 - Dust Mask (0)
 - Hearing Protection (0)
 - Safety Harness (0)
 - First-Aid (0)
 - Fire Extinguisher (0)
 - Carbon Monoxide Monitor (0)
 - Fire Extinguisher Mount (0)
 - Car Seat Locking Clip (0)
 - Earplugs (0)
 - Knee Pad Set (0)
 - Maintenance Tag (0)
 - Safety Triangle (0)

20518 Functional Fluid, Lubricant, Grease (including Additives) Engine Oil (LD)

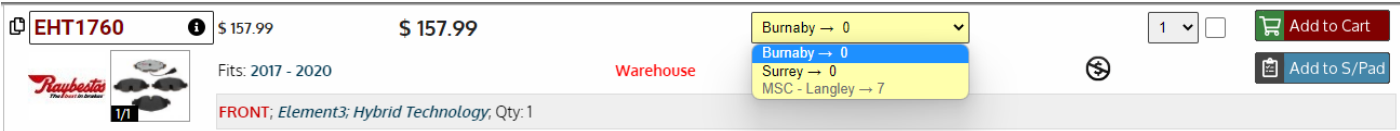

The product search results are weighted and sorted based on where the matching terms were found. Terms matching in the product classification or part number will show before an item with a term matching in the product attributes.

Quicker Warehouse Availability

We have updated the application listing screen to now include a sponsor's primary warehouse in the on hand drop-down to save the user from clicking on the warehouse lookup button

The check warehouse button is still available and can be used to search all available warehouses

The warehouses cannot be selected as a potential ordering source, but any items ordered will indicate local availability when printed out as per your out of stock message settings.

Shopping Cart Redesign

We have updated the look and feel of our shopping cart pages to be more user friendly and help us prepare for future updates such as taking online payments.

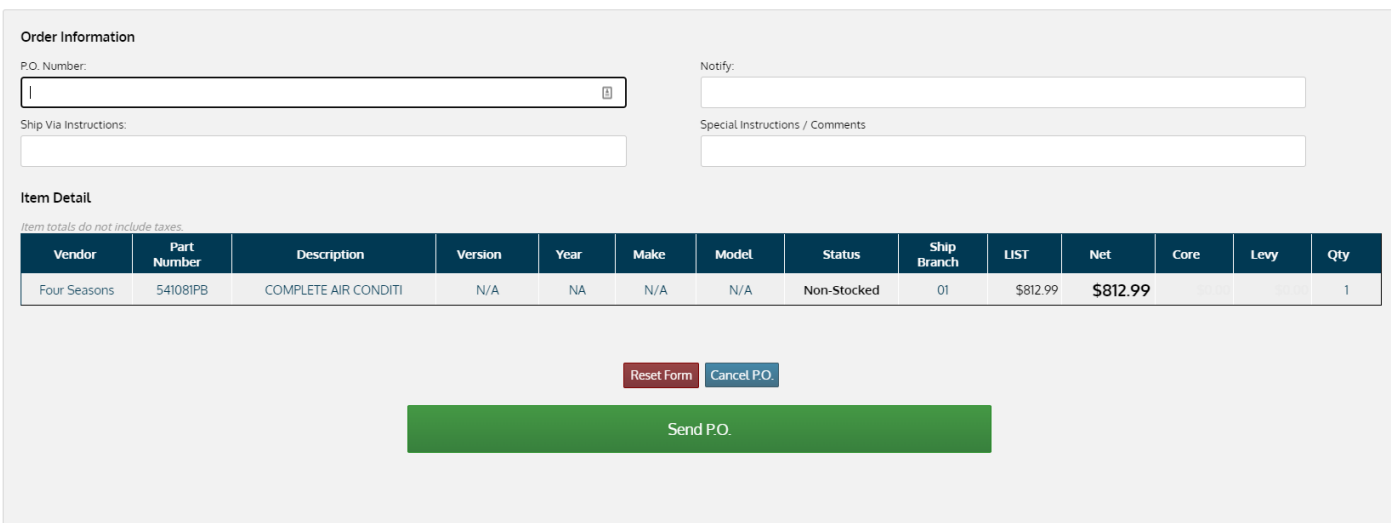

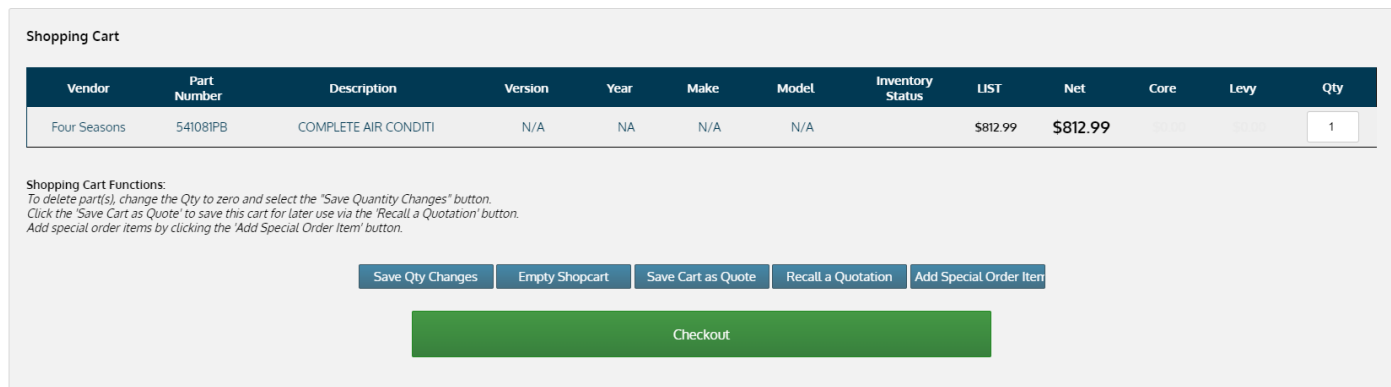

Image Count

Image thumbnails now include a small count to tell users how many images are available for the item.

Order Splitting

Previously, when a customer selected a secondary branch from within the shopping cart, the order would be split and sent to the respective branch. With more customers having locations out of market and recent updates around the ability to customize comments on the order based on branch and corporate availability, we have modified this behavior.

Inventory Status	LIST	Net	Core	Levy	Qty
Burnaby → 3	\$181.99	\$181.99	\$0.00	\$0.00	1
Surrey → 1	\$144.99	\$144.99	\$0.00	\$0.00	1

Now, when a customer selects a secondary branch from within the shopping cart, the entire order will be sent to the customer's servicing branch, but there will be a comment line below any numbers where stock is in a secondary branch. This comment will match your **Invoice Transfer Message** as set in your website settings.

Invoice Transfer Message:

Invoice Order Message:

Eco Fees

For all items that have an applicable eco-fee, the eco fee price will be listed in autoecat. This includes application listings, part search listings and the shopping Cart

Engine Oil Filter Select Brand Show In-Stock Only Filter Results by Keyword

List	Net	Core	Levy	Availability	Purchase Qty
 P40010 \$16.49	\$ 16.49	\$.55	In House	Burnaby → 3	1 <input type="checkbox"/>
Fits: 2017 - 2020 Check Warehouse					
OE Number : 6L115562; Qty: 1					

Retail Pickup Customers

Shopping Cart

The shopping cart for retail pickup customers has also been updated

Customer Information

Email:

Name:

Special Instructions / Comments

Order Information

The Following Parts Will Be Ordered:

- A valid email address is required and will be used to recall your order on pickup.
- Orders will be held for 24 hours.

Item totals do not include taxes.

Vendor	Part Number	Description	Version	Year	Make	Model	Status	Ship Branch	List	Net	Core	Levy	Qty
Baldwin Filters	P40010	Engine Oil Filter	0488037	17	AUDI	A3	Stocked	01	\$16.49	\$16.49	\$0.00	\$0.55	1

Customer Email

Optionally, when the retail pickup customer submits an order, they will now receive a confirmation email providing a list of items ordered as well as the web reference number. A sample of this email can be seen below:

Hi XXXXXX,

Thank You, we have received your order for the following items and it is currently being processed.

[EHT537H] Disc Brake Pad Set - Qty: 1

[MGD948CH] Disc Brake Pad Set - Qty: 1

When coming to collect your items, you can reference your web reference #00000575 or our internal order #1200381

In COUNTERPOINT, staff can recall web orders quickly and easily by opening an invoice session using the online retail account. Once opened, the invoice screen will prompt that there are open orders. Selecting to view the open orders, you can enter in the customer's "web reference" number to recall the order.

Alternatively, you can recall the order directly if the customer provides you with the "internal order #"

Default Transaction Setting

We have updated the system to properly handle the customer's 'Default Transaction' type.

Default Transaction: Invoice Open Order Packing Slip

Changing this setting in the Dealers preferences screen will modify what transaction type will be used when the customer submits a web order.

Default Landing Page

We have updated the default landing page setting to add an option for the default landing page to be the new 'non application' catalogue

Autoecat First Page Catalog Stock Order Non Application **All:**

Bug Fixes

User comments on substitute items

The error in which user entered comments would disappear on items with a substitute has been resolved

In House		Warehouse					

Suffix exclusion on long part numbers

A bug had appeared where part numbers longer than 10 digits would not respond to suffix based exclusions. This has been addressed and fixed.

Incorrect sorting on multiple heading selection

When picking multiple part types, the subsequent listing of products would only follow the manufacturer's ranking for the last product type listed on the page. We have modified the code to ensure that all product types follow to the rankings set in the catalogue preferences.

Price Breaks Displaying on Substitute Items

We have fixed a bug where price breaks would display on a substitute item when it should have only applied to the primary item

	9003SZPB2	\$ 100.99	\$ 69.99	\$ 100.99	Burnaby → 0	1
