### Catalogue Feature Enhancements

This month, we added the ability for customers using JDispatch to have their autoecat users be able to check the status of their delivery. In the 'Order Review' screen, a new button will show beneath the delivery status (if enabled)  button will show beneath the delivery status (if enabled).

Clicking the button will present the user with the status of their invoice, and ETA if the order is in transit and the location of either the current driver location (for in transit invoices) or the delivery location (for delivered invoices). Delivered invoices will also allow the user to click the status button to see a copy of the signature taken.

### Catalogue Bug Fixes

Fixed a bug where some parts looked up via a part search did not have the proper onhand coloring applied to the branch location dropdown. In this scenario, all items showed red drop-down boxes, even if stock was available.
