

# Supported Devices

## Supported Devices

Officially, Counterpoint Cloud Platform supports any device that meets the following criteria:

1. Is running the latest version of one of the following browsers:

- [Mozilla Firefox](#)
- [Google Chrome](#)
- [Microsoft Edge](#)
- [Google Chrome for Android](#)

2. Has a Viewport width of at least 1280.

*This includes most devices with an 8 inch screen or bigger, made within the past few years. To check your viewport size, visit [this site](#).*

This means that we support the majority of desktop computers, and larger tablets. If you wish to use Counterpoint Cloud Platform on a device that does not meet these requirements, there is no hard requirement - some features may just fail to load, or display incorrectly.
