

# V1.4.1

## V1.4.1

### New Features/Improvements

Added a "Fiscal Year" selection to time-based comparisons

The screenshot shows a dark-themed interface with a 'Time' tab selected. It contains two columns of radio button options: 'Relative' and 'Completed'.

Relative	Completed
<input type="radio"/> MTD (Month over Month)	<input type="radio"/> November 2021
<input type="radio"/> MTD (Year over Year)	<input type="radio"/> October 2021
<input type="radio"/> Year to Date	<input type="radio"/> September 2021
<input checked="" type="radio"/> Fiscal Year to Date	<input type="radio"/> August 2021
<input type="radio"/> Previous 30 Days	<input type="radio"/> July 2021
<input type="radio"/> Previous 60 Days	<input type="radio"/> June 2021
<input type="radio"/> Previous 90 Days	<input type="radio"/> May 2021

Note: This relies on the "fiscalStart" setting, which defaults to "01-01". This setting is available under *Server Settings* in the *CP2 Admin* module.

### Remove cash/retail accounts from Top Customers

The "Top Customers By Sales (GP%)" graph on the FlightDeck Dashboard now excludes accounts that are listed in the *cashCustomers* admin setting.

### CPMailer Date Comparison Daily/Weekly Update

The CPMailer module now pulls same day of same week for its daily reports.

i.e. a Monday will always be compared to a Monday, and so on.

Additionally, weekly comparisons should now work correctly on years that have 53 weeks when they are compared to years with 52 weeks.

## "Returns" CPMailer Block

### Returns

Here is a list of returns from this time period.

Acc.	Name	Invoice	Date	Br. Type	Clerk	Pay Cat.	Part	Qty.	Ext.	Cost	GP%
------	------	---------	------	----------	-------	----------	------	------	------	------	-----

A new CPMailer report block adds a list of returns to your nightly, weekly, or monthly email.

This report block may be temporary, as this information may become available as part of a bigger analysis on the COUNTERPOINT Cloud Platform at a later date.

*Note: On a weekly or a monthly report, this block can get to be quite long.*

## New Custom Reports Fields

### Sales Reports

- **Invoice Day of Week:** The day of the week that the invoice was sold (Monday, Tuesday, etc..)
- **Invoice Hour:** The hour of the day that the invoice was sold (Represented in 24 hour format)

### Inventory Reports

- **Avg Cost - Current:** Average cost value of items that have been sold in the past 12 months
- **Avg Cost - No Sales in 1 year:** Average cost value of items not sold in past 12 months, but sold in past 13-24 months.
- **Avg Cost - No Sales in 1 year:** Average cost value of items not sold in past 24 months, but sold in past 25-36 months.
- **Avg Cost - No Sales over 3 years:** Average cost value of items not sold in past 36 months.

## Small Fixes

- Fixed an issue where old files could be stuck cached in your browser, preventing you from loading the new version of a module

- Updated the list of columns available in the Report Generator
- Removed duplicate columns from being displayed in the Report Generator
- Modified the Minimum and Maximum columns on an Inventory report to work properly with filters
- Fixed the Quick Edit UI not displaying properly when editing a saved report
- Restored the export buttons on the Old Stock Report table
