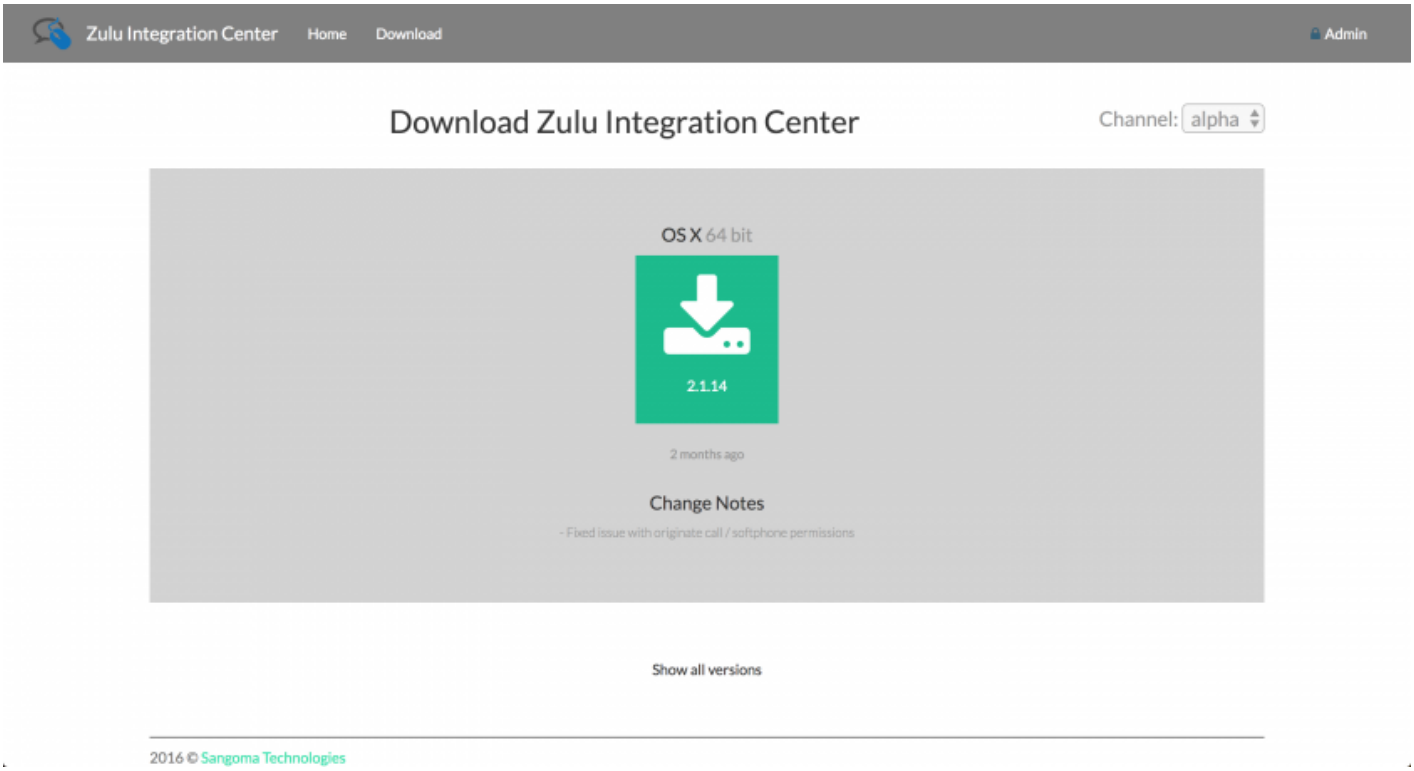
Using the Zulu Desktop Client

Installing the Desktop Client

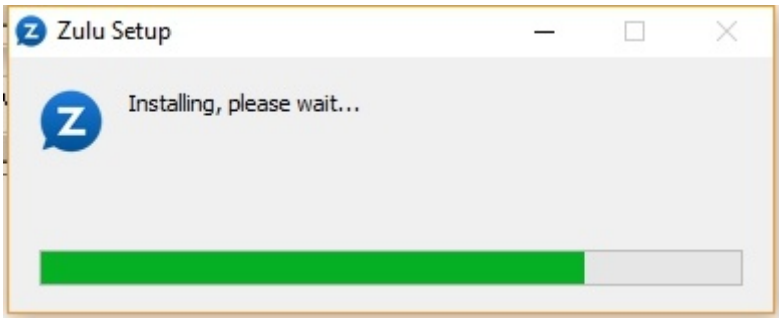
Download the desktop client



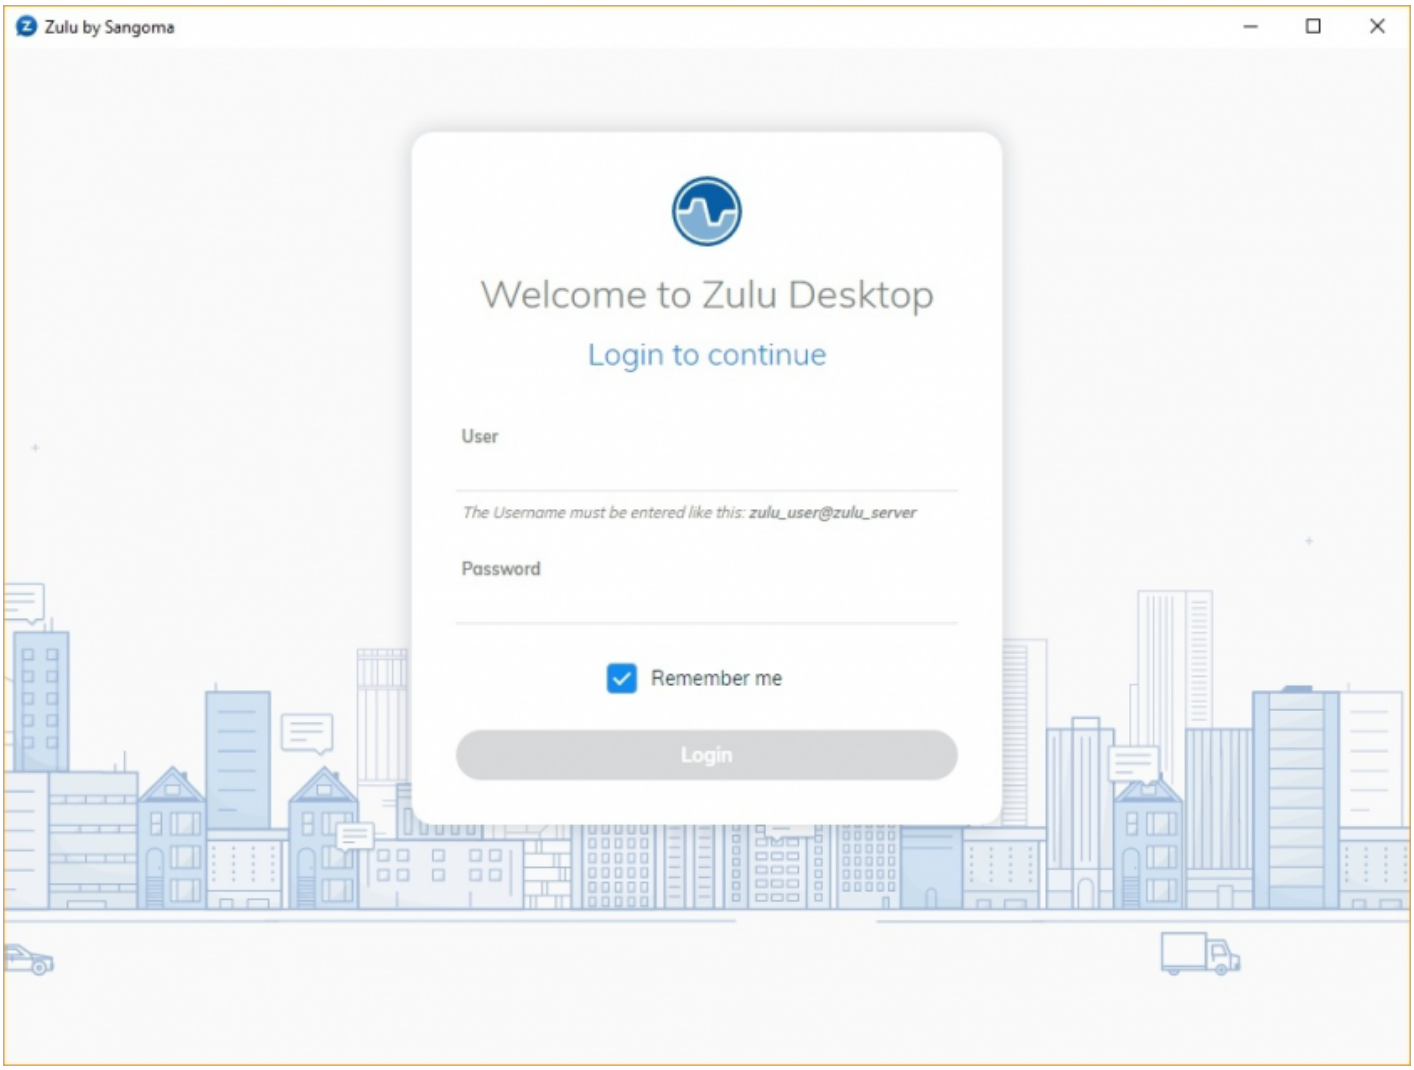
Navigate to https://zulu-updater.sangoma.com/releases/stable and download the current desktop application for your given platform.

Install on Windows

Click the Zulu-3.x.x.exe file you downloaded.



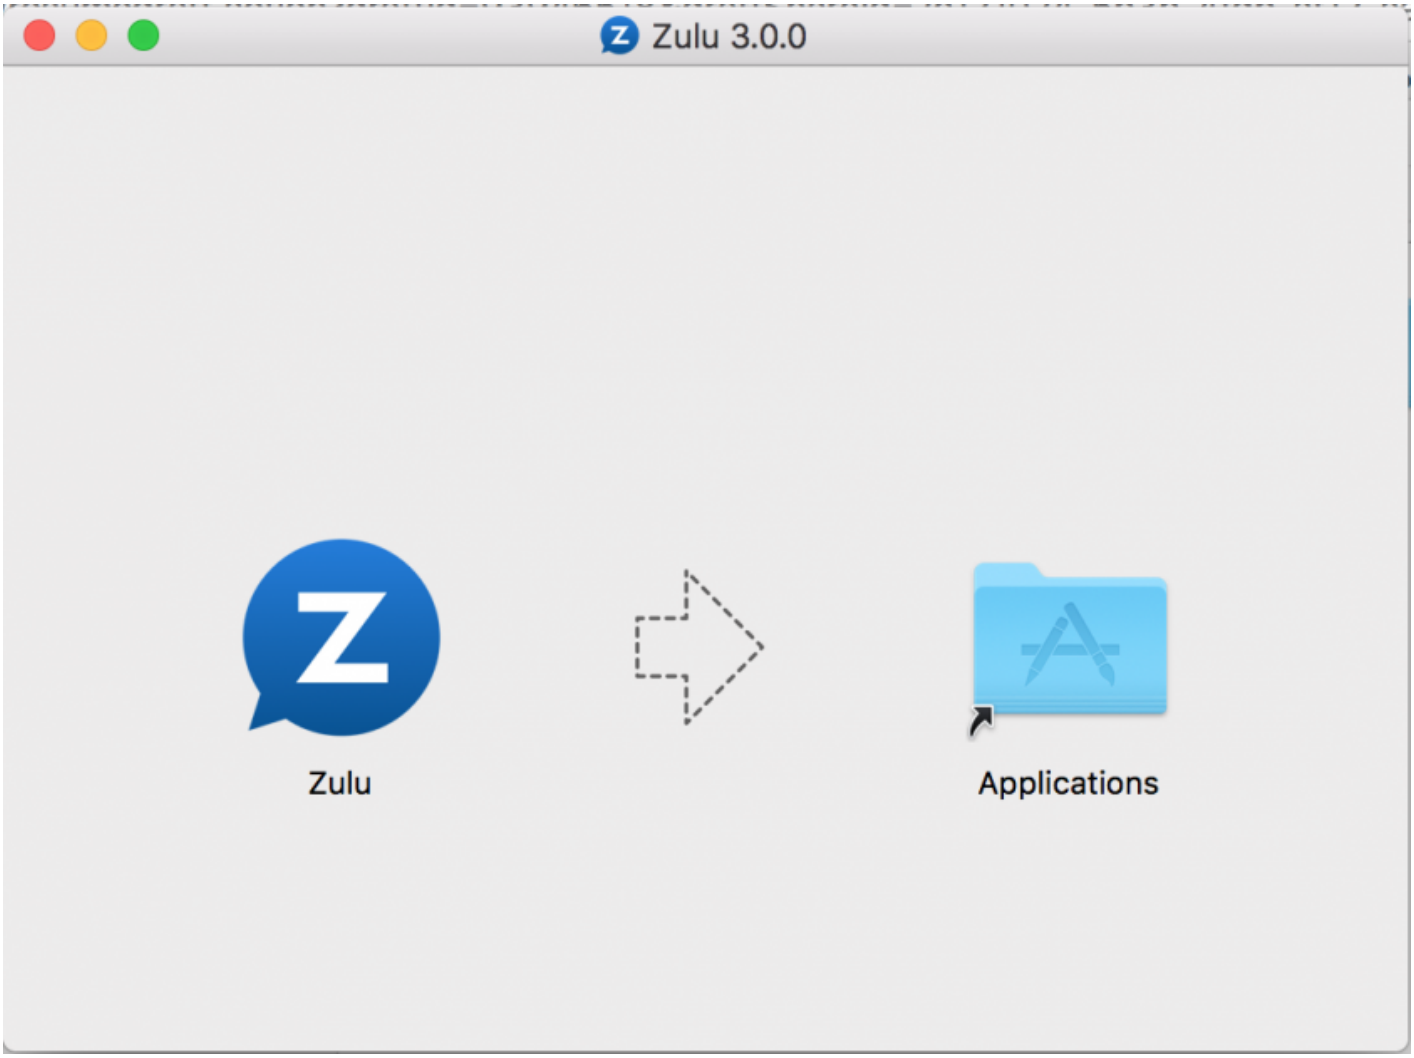
Wait while we install the applications



After installation it will prompt you to login.

Install on MacOS

Double click on the Zulu-3.x.x.dmg file you downloaded

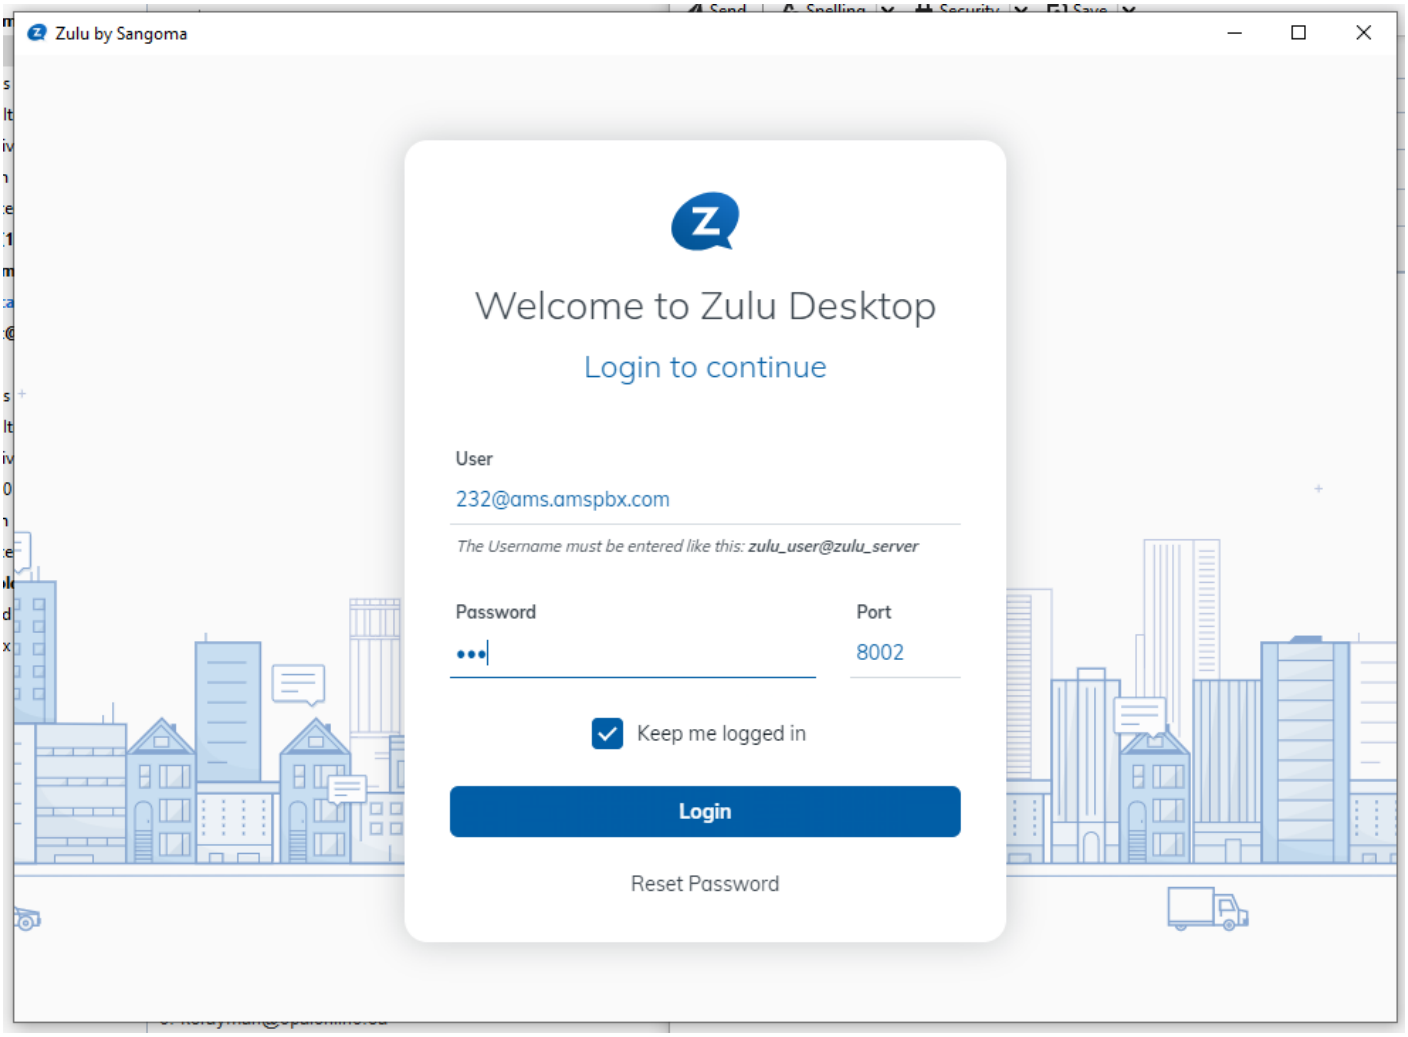


Drag Zulu into the Application Folder

Open Zulu by clicking on the Zulu icon in Launchpad

Configuring the Desktop Client

Once the desktop client is installed on your device, it will prompt you to log in. You will then be presented with the login page.



You will need to contact AMS for your User and Password info. The port will always be set to 8002.
